TigernixPOS

Point Of Sales System

SOLUTION OVERVIEW

TigernixPOS is an all-inclusive Singapore-based Point-Of-Sale (POS) system. It is a one-stop solution for managing the entire retail business operations and comprises POS software, Retail Customer relationship management software, Retail Finance and Account management, Retail Human Resource Management, Inventory management, Purchase management, and VIP Membership management.

TigernixPOS is a web-based system, with user-friendly design and features that enable you to not only manage administrative and operational work, but also intelligently manage your costs, thereby increasing your ROI substantially.

In addition to the comprehensive features, TigernixPOS also provides warranty management and manages all your documentation for after sales support.

ADVANTAGES

With TigernixPOS, your organization can efficiently manage your entire retail business process and operations, thereby cutting time and cost.

Improved efficiency of employees

The POS system is a convenient and organized way of managing retail sales. With a comprehensive database of product inventory, category and pricing, employees can perform billing tasks faster and without having to worry about errors.

TigernixPOS system improves the confidence and efficiency of employees by cutting out the manual intervention of billing process. This system also allows employees to additionally offer better customer service which ultimately brings you a more loyal customer base.

Accurate and easy report generation

TigernixPOS is a dexterous system that not only tracks and maintains product details, but also allows you to generate customizable reports of your choice. You can generate critical reports such as daily income and expense, inventory status, and product listing. A combination of such information helps with to understand your business progress and success.

This system also allows you to create and generate advanced reports to identify sales trends for products and in general. This allows you to keep a check on your inventory and organize stock levels in advance.

Quick and easy stock management

TigernixPOS simplifies the task of maintaining and managing product stock. A lot of manual work is eliminated and a simple bar code reader does the job for you. The system enables you to scan all stock upon delivery and capture it in a digital database. This gives you an overview of stock levels and helps you make accurate purchasing decisions. You can save time and cost instantly with defining this process.
