

# TigernixERP

Enterprise Resource Planning System  
**Accounting & Finance Management**

SOLUTION OVERVIEW

## SOLUTION OVERVIEW

TigernixERP has its specialized accounting software module which puts financial reports you need at your fingertips! All the functions related to accounting and bookkeeping can be automated with this module of Tigernix-ERP system. This is simple yet a comprehensive module which seamlessly integrates recurrent nature of daily activities like invoicing, payroll management, receipt scanning, payment processing and more.

Deployment of the software is super easy as the software has designed with a user-friendly interface. This accounting & finance management software has been structured to comply with Singapore Accounting Standards and GST rates which is why every local business should implement TigernixERP today itself in your business.

# ADVANTAGES

Apart from the top specialty of this module; compatibility with local accounting standards, there are other hosts of advantages of TigernixERP.

## Complete automation

Upon the implementation of Tigernix-ERP, your conventional bookkeeping system will be fully automated. You will witness the incredible difference between the pen-and-paper and automated TigernixERP system. With organized transactions and records in the system, you can have a strong grasp on the finance performance of your business. The time you spent on recording hundreds of daily transactions updating several documents for the same transaction will be saved and you can be more focused on the strategic perspective of the business.

## A multiple user software

Without an issue, even all the members of the finance department of your business can use this module as it is exclusively outlined allowing multiple users to work contemporaneously. Thus, this is a collaborative software which suits well to a team of users in the business. It is not essential to conduct a costly outbound training program to train the employees to get adapted to the new system as Tigernix always offers straightforward and easy-to-use software solutions.

## Flexibility

Though the module comes as a generic accounting software package, it can be customized according to the requirements of your business. Based on the requirement of your accounting department more features can be added upgrading the software.

## Integration

TigernixERP integrates this module with other organizational modules causing a synchronized effect. Through synchronized functioning among other organizational processes, the organization will gain the improved results of synergy. Since each and every function of a business either is directly or indirectly involved in transactions and events, this seamless integration makes the financial reporting more convenient rather than picking bits and pieces from here and there.

# BASIC FUNCTIONALITIES

TigernixERP Accounting and Finance module offers the following functionalities for a superior performance.

## Diversified Automation

Once the accounting and finance module of TigernixERP is executed in your system, different aspects of the system will be automated replacing regular manual and semi-manual systems. This is a key feature that saves you time substantially.

- Easy automatic description
- Automatic GST calculation
- Computation of due dates
- External payment management
