

TigernixERP

Enterprise Resource Planning System
Project and Costing Management

SOLUTION OVERVIEW

SOLUTION OVERVIEW

Project and costing management is a multifaceted function in which efficiency is of paramount importance. Understanding the importance of efficient project and costing management, TigernixERP offers its ace software solution in Project and Costing Management.

Effective project and costing management require the implementation of standardized process and ultra-modern software tools such as TigernixERP as it offers a fully integrated software module which enables you to have a solid grasp of your time plan, an understanding of your budget, resource allocation, total quality management and much more. With this module of TigernixERP, you can have more control over your projects, centralize the resources, digitalize the process and create a collaborative workplace.

ADVANTAGES

This Project and Costing Management software solution helps your teams handle projects smoothly from start-to-finish.

Simplifies the Intricate Functions

As the module automates the project and cost planning process of your business, it streamlines the process up to a great extent while allowing you to split your complex projects into number of simple tasks as you want. From communication to repetitive tasks to drafting to scheduling, all the functions will be automated with this Project and Costing Management software solution comes with TigernixERP.

Easy Project Management

TigernixERP's Project and Costing Management software automatically keeps your project teams properly organized and keeps tabs on the progress of the projects. Since the software module comes with a comprehensible interface, your project teams will get the hang of it right away. Thus, the overall project management function will be something just nothing more than clicking and pointing.

Manage project costs

Since there is a gourmet of cost controlling and analysis options presented in TigernixERP's Project and Costing module, all the cost components related to individual projects can be examined and analyzed separately. Therefore, financial resources can be fittingly allocated for projects, eliminating financial losses occur due to misutilization of budgets.

Most accommodating to Project Managers

With TigernixERP the everyday mess of spreadsheets, bulks of emails and scribbled whiteboards of the project managers can be replaced with a methodical digital platform. Therefore, the heads of projects will be freeing up for getting engaged in non-programmed strategic managerial roles.

Web-based Project

TigernixERP offers this software solution as a web-based module. This enables you to monitor the progress of the projects and cost behaviour over the process anytime, anywhere with its real-time information. The software allows users to access the system directly through the internet, enabling working at home.
