

TigernixLMS

Learning Management System

SOLUTION OVERVIEW

SOLUTION OVERVIEW

TigernixLMS is a modern learning management software that provides a centralized platform for information and education. Through TigernixLMS, development, training, academic and performance content can be provided anywhere, anytime to the users and other target beneficiaries. The education institutes can ensure the persistence in the delivery of academic resources and materials over the period of the academic programs.

TigernixLMS simplifies the learning process by providing all the supportive materials to the students and creates a platform where the users can interact with resource personnel. As a company that booms with new inventions and innovations, Tigernix has developed this ultimate learning management software with remarkable options to facilitate the learning process of users and trigger their academic performance. The software fits for both businesses to host their compliance training programs and academic institutions to improve the teaching patterns.

ADVANTAGES

Offering you an end-to-end learning management software solution, advantages this software deliver can positively transform your business in a great deal.

Efficient learning experience in a unified training platform

TigernixLMS is designed as a unified learning platform which is convenient for both students and resource providers. With this software the academic institutes can develop content, training modules and performance assessment criteria for different categories of courses simultaneously. The learning materials can be offered in texts, graphics and multimedia files that optimize the learning experience of the users. TigernixLMS offers students and resource personnel to interact via video conferencing, threaded discussions and forums. This software facilitates course administration and related documentation as well.

Easy tracking and reporting

With TigernixLMS, you can improve performance through trackable tools and reporting tools. This enables you to track the performance of new trainees and monitor their records easily. In the academic environment, TigernixLMS tracks all the information related to the courses enrolled by the student while enabling the institute to offer and manage a diverse of training modules. Apart from that, the software will help you track from course materials availability to trainee behavior to the growth of your business which you can use to deliver a better service.

Interactive courses and intelligent evaluation

TigernixLMS creates a two-way communication platform between the users and the resource providers. Thus, the interaction and engagement of the said two parties in a cyber-platform are promoted. This provides a “close to a physical classroom experience” and creates more interaction than in a physical learning environment. This offers interactive tools like instant messaging, forums, video conferencing and more.

BASIC FUNCTIONALITIES

TigernixLMS is a comprehensive software package that creates a surpassing learning and teaching environment which is a blend of first-rate functionalities.
