

# TigernixJoin

Video Conferencing System

SOLUTION OVERVIEW

## SOLUTION OVERVIEW

Remote communication is the new face-to-face meeting. Businesses and organizations worldwide have embraced the concept of remote meetings using several platforms. It is the new-age workplace, school, college and just about any business.

TigernixJoin is a leading-edge meeting platform that is vouched by its users worldwide. What makes TigernixJoin stand out of the crowd is its unique and robust features. Tigernix is always futuristic and feels the pulse of global need. Videoconferencing at your convenience, using high-speed Servers and exceptional quality uninterrupted visuals, with more than perfect security, is more than what any organization or person can ask for. TigernixJoin is a superior quality product that makes your remote meetings smooth and seamless without any technical glitches and with complete security.

From large businesses to small and medium businesses, to individuals, schools and educational institutions, TigernixJoin caters to every sector.

# ADVANTAGES

## Enhances Productivity

TigernixJoin enables glitch-less and stress-less live meetings, training sessions, global conferencing, and presentations. From corporate organizations to educational institutions, TigernixJoin caters to all. This means that you can work uninterrupted and increase your productivity rate.

Fast access, instant meeting creations, quick join and monitored admin rights- the platform has it all. While you focus on providing quality service, we act as your catalyst by providing the best product.

## Better Communication

Our high-end technology coupled with the backend supported by high-end and optimized servers and data centers, assure high quality and fast streaming of video. This ensures that users enjoy better communication.

Remote meeting applications should eliminate the feeling of remote communication by ensuring clear audio and video. TigernixJoin replaces and surpasses face-to-face meetings with exceptional clarity. This is crucial since remote meetings are across geographies.

## Value For Money

TigernixJoin is priced competitively as against most of the available platforms. In comparison to the features and cost of the application, TigernixJoin is economical and provides far more advantages than the others.

Customizable and dedicated, this application is the best bet for organizations.

## Built To Suit Your Need

TigernixJoin is creative in allowing personalization to your URL. You can customize the URL to reflect your company or brand. This adds value and creates brand identity to your company and brand recall for the users.

Video platforms are many, but TigernixJoin surpasses all of them. Secure, simple, fast, reliable and customizable – it's got everything and more you need to keep your business globally remote.

## Secure Client Data

Security is of prime concern when you have clients worldwide and loads of data is transmitted. Our platform is highly secure and built on latest technology. You can be sure that your data is safe and your conversations are secure.

TigernixJoin ensures that your data is protected and all levels of security are maintained. With good data security, you can be assured that you can boost your business ROI. Your clients and users' comfort will be top priority and you can in turn build your credibility and business success.

## Robust Platform

Tigernix is known for its sturdy applications. TigernixJoin is robust and provides the best speed, reliability, security and stability. As a stable platform, TigernixJoin manages any volume of users across the world. The platform provides you best-in-class connectivity by employing Servers that have lightning speed capacity, the reason for uninterrupted services. The data Servers are located within the country ensuring data security.

## Seamless Video And Audio

Communication platforms thrive on uninterrupted service and clear audio/video. Most platforms struggle to match the video and audio clarity, leaving screens as broken or frozen. Often meetings are interrupted by broken audio links and frozen video screens. TigernixJoin is a breath of fresh air in a market of weak products.

TigernixJoin offers video and audio quality as good as a face-to-face meeting. This is possible with its high-speed Servers and double-layered security.

# BASIC FUNCTIONALITIES

## Dedicated Servers

Ample security measures are needed to ensure data and communication safety. With loads of users flocking communication platforms, data management is haywire. There's a rising concern for data security and uncertainty in data storage. More and more organizations are worried for the data storage and data transfer without any security or assurance.

This concern is relatable and critical. TigernixJoin has all these concerns addressed and solutions implemented in the platform. There's no fear of data misuse or even theft.

- Data is streamed through dedicated servers.
- Your data is within your country.
- No breach of security.
- No data misuse or theft.
- Conferencing services deployed in your own Servers.
- Levels of data security.
- Privacy of users secured and sealed.
- Fast streaming.
- Secure and monitored links.

## Unmatched Quality

Tigernix is known for its quality of product and service. For fifteen years, the company has established itself as a reliable and quality provider of any software requirement. Global clients are more than delighted to be associated with Tigernix.

TigernixJoin is built on the same ground of dependability, stability, reliability with unmatched quality. In a communication platform, video and audio are pillars. TigernixJoin provides a platform that is as close as face-to-face and gives a similar comfort level to the users.

- Smooth video and audio transmission.
- High-end Servers used for deployment.
- Intelligent Servers automatically scale, analyze and disburse data.
- Consistent performance.
- No audio hiccup or lag in delivery.
- No video glitch or broken screens.
- Handles user load perfectly.
- Superior and unmatched audio and video.

## Easy Customization

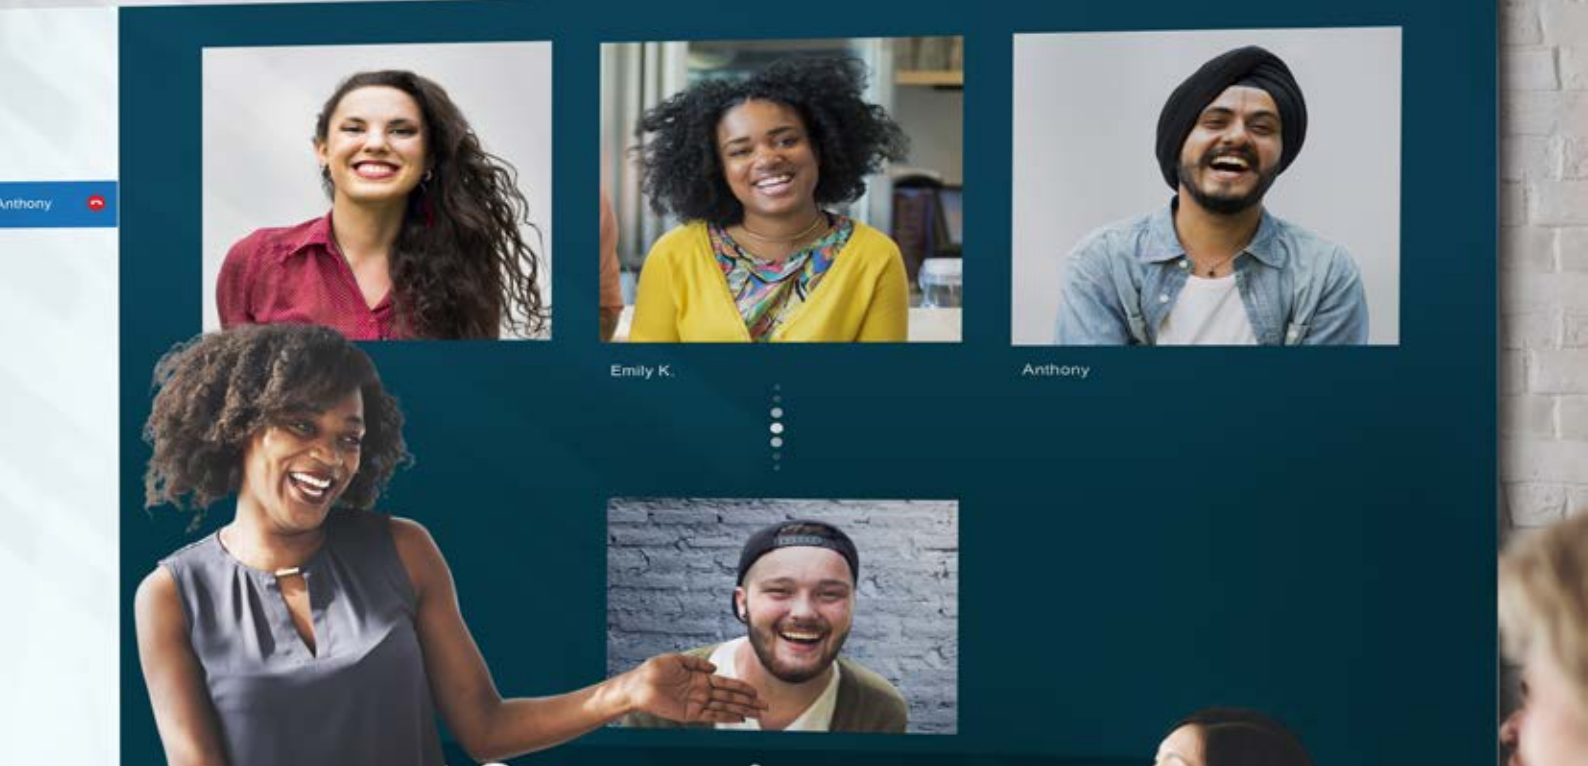

Communication tools are straightforward and allow for just the required functions. TigernixJoin is a cut above the rest. With this platform, you can personalize the platform as you require for your domain. Small or big business, or educational institution, you will need certain customizations. Our platform allows you to brand, create brand identity and sustain brand recall.

- Own brand of video conferencing portal.
- URL in your brand name.
- Unique application-based customizations.
- Need-based functions.
- More branding, more business.
- Added unique organization-based features.
- Mobile apps on Google Play and Apple Appstore.

## Strong Backend

Technical understanding of the growing user demand and backend support is decisive. By backend, we mean the technical specifications and the build of the Servers and supporting tools. The smooth operation of any service is held by a strong and unseen technology – that is robust and dynamic.

- Streaming servers built using unique algorithm.
- Streaming 10x faster than others.
- Videos are not saved.
- Videos streamed and routed.
- No glitch in streaming.

## Security and More

Globally, the prime concern is security – and why not? Data security, when managed, communication is without any concerns. Business and operations happen without any hiccup. TigernixJoin has features that are created to cater to the more intricate needs of users. It is all about safety and security.

Conferencing, in TigernixJoin, by itself has two levels of security! The features are designed to answer your every little question on how to manage random issues that occur during conferences. From audio/video glitches to voice or image lag, to strict monitoring of users, TigernixJoin has them all.

- Secure meeting ID for privacy.
- A 10-digit random ID is generated as ID.
- Participant passcode is another level of authentication.
- Only authenticated users can create the meeting request.
- More application sharing options.
- Share videos during meetings.
- Chat during meetings to convey important points.
- Wave or raise your hand to make a point.
- Meeting lock blocks any external user to join meetings.
- Random users cannot join meetings.
- Meeting host can remove participants.
- Irrelevant participants can be removed by the host.
- Endpoints with sufficient encryption capabilities.
- All video calls are encrypted, safe and secure.
